ABOUT IISER

Presenting Anvesha 2026 – the annual science fest of the Indian Institute of Science Education and Research (IISER), Thiruvananthapuram! This year, the fest will be from October 30th, and will provide active minds in science the opportunity to upscale their knowledge and abilities. All the student-run clubs from various departments have arranged the following opportunities for school students as well as bachelor's and master's students.

The fantastic campus, wide range of opportunities and myriad fun activities in line are sure to amaze, excite and Inspire all participating students. Do not miss the chance to explore and enjoy the beautiful scientific world that IISER Thiruvananthapuram is!

A repeating pattern of yellow line-art icons on a white background. The icons include various scientific symbols: beakers with bubbling liquids, flasks, bar charts, a magnifying glass, a microscope, and molecular structures. The pattern is dense and covers the entire top section of the page.

Institute Open Day

Everyone is curious about what really goes on behind the lab doors. When one thinks of a laboratory, sterile white countertops and beakers with colourful bubbling liquids is what comes into mind, but is that really what science looks like?

Come and see for yourself! At IISER TVM's Open Day, students from schools and other institutes are invited to step inside and experience the world of research firsthand. Anvesha '26 offers inquisitive minds the chance to meet and interact with researchers from diverse fields and disciplines, and to discover the real stories of science beyond the textbooks.

Aficionados

Step into the heart of Anvesha '26 at our Grand Science Expo: Aficionados, where curiosity meets discovery. This vibrant showcase brings together groundbreaking research, interactive exhibits, and live demonstrations designed to make science come alive for everyone. From thought-provoking models and hands-on experiments to engaging conversations with young researchers, the Expo is a celebration of innovation across disciplines. Students from all the disciplines of science come together, annually, to present and talk about their work and research here at the Expo. Whether you're a student eager to explore, a teacher seeking inspiration, or simply someone who loves to ask "why," the Grand Science Expo promises something for all. It's not just an exhibition; it's an invitation to experience science as it is practiced today: dynamic, collaborative, and endlessly exciting.

Utsuk Quiz

True to its name, Utsuk, derived from the word for curiosity, celebrates the spirit of questioning. To be held on Oct 26th, 2026, this school level science quiz organized by QSI, is designed to spark young minds, challenge their knowledge and encourage them to think beyond textbooks.

From quick fire questions to thought provoking puzzles, this quiz has everything that a sharp mind would ever want. It promises a fun, competitive and intellectually engaging experience, and inspires students to ask more, learn more and discover more. So form your teams (teams of 2 students for the first round) and let your curiosity take the lead!
